Future Home of PERRY MEMORIAL FAMILY HEALTH CLINIC  Opening Late Winter 2020

Our Family Health Clinic will move to a new 15,200 square feet building across from Perry Memorial Hospital and Medical Office Building facilities. The new location and expanded Family Health Clinic will strengthen convenient patient flow efficiency and care as part of the Perry patient experience. The one-level building interior will include a registration and waiting area, 21 exam rooms, two procedure rooms, a bariatric and vitals room featuring a wheelchair scale, and a conference room.

www.perrymemorial.org

Patient Admits: 734
ER Visits: 7,825
Clinic Visits: 35,915
Surgeries: 677
Inpatient: 175
Outpatient: 502

Special Procedures: 1,040
Endoscopy & Pain Lab Tests: 105,146
Imaging Procedures: 18,673

Dr. Faber is genuinely committed to rural healthcare and specifically the care of residents of this community. He demonstrates daily his compassionate (and sometimes humorous) approach to patient care, staff interactions, student and new practitioner mentoring, and community involvement.

Abby’s vivacious smile, warm personality and positive energy will help patients come to understand the health benefits associated with preventative care to guide their health. “Health starts the day we are born” - Carol Debruhl, APRN, FNP (R). Carol provides her smile to Liberty Village residents to help them manage their care as they age.

A Community Health and Wellness Journey - Abby Vladika, APRN, FNP (L). Abby’s vivacious smile, warm personality and positive energy will help patients come to understand the health benefits associated with preventative care to guide their health. “Health starts the day we are born” - Carol Debruhl, APRN, FNP (R). Carol provides her smile to Liberty Village residents to help them manage their care as they age.

Expanded PROVIDERS

Focusing on community needs, Christina McDorman, APRN at Perry Memorial Henry Clinic is now seeing patients for regular check-ups, physical exams, immunizations, and non-urgent walk-ins.

Provider SPOTLIGHT

Dr. Arnold Faber, 2018 Illinois Rural Health Physician of Excellence recipient

Carol provides her smile to Liberty Village residents to help them manage their care as they age.
is to provide compassionate, quality health services to the people and communities we serve.”

“The Mission of Perry Memorial Hospital is to provide compassionate, quality health services to the people and communities we serve.”

“Perry Memorial Hospital is the active leader to consistently meet the healthcare needs of the communities we serve through development of external and internal partnerships and processes which support the care continuum that delivers excellent quality care and customer service.”

Expanded COMMUNICATION
Message from Annette Schnabel, President & CEO
Perry Memorial Hospital focused on transition of electronic records during our fiscal year 2019. After 20 years on the prior system and a 2-year evaluation, Perry determined a new system would enhance patient care and documentation. Today’s electronic medical record not only houses our patients’ medical history, but also provides the opportunity to evaluate health trends for our patients and our communities. Information gleaned from the medical record informs us on how we can assist to improve the life and health of our patients through chronic condition management, through more timely diagnosis of early stage diseases, and by sharing information across our multiple care providers and with our patients through the enhanced patient portal. The new electronic medical record also provides enhanced safety features.

Implementing new systems can be a daunting experience. While we did experience challenges in our billing office, we believe we are moving forward with a better integrated system to continue supporting patient safety. I appreciate the dedication of our team implementing this new system that allows us to serve our community better.

Expanded PARTNERSHIP
Perry is working in collaboration with Freedom House and other area partners on the federal domestic and dating violence victim grant to provide a coordinated response to victims of sexual assault and domestic violence in the Illinois Valley area. Perry nurses, Erika Darymple and Kim Morse have completed training to be Sexual Assault Nurse Examiners (SANE). They are part of a joint Bureau-putnam County Sexual Assault Response Team (SART). The SART team will ensure comprehensive and specialized services for both males and females - including enhanced evidence collection - to prioritize continuity of care for victims.

Expanded SERVICES
Perry Memorial Hospital opened June 17, 1920. Today Perry is a 25-bed Critical Access Hospital with 22 Acute Beds and 3 ICU Beds (all have capability of observation or swing bed).

Medical Staff:
221 (including specialties)

Perry Providers:
5 full-time primary physicians
1 part-time pediatrician
9 full-time nurse practitioners
1 full-time physician assistant
5 specialty providers
15 full-time contracted board-certified Emergency Medicine physicians

Perry Employees
370 Total (320 FTEs)
4 current sites of care - Perry main campus, Prompt Care, Walnut, and Henry

We are very excited about the future of care at Perry for our communities as we expand our role and footprint:
• Acquisition and management of Primary Care Providers and Prompt Care
• Development of Walnut and Henry Clinics
• Expansion into specialties: Orthopedics, General Surgery, Pain Management, Podiatry
• Transitioning Inpatient Care to a Hospitalist Model
• Adding Mental and Behavioral Health Services

Expanded PROVIDERS
Dr. S. Das Pamnani (right) and Dr. John Ibrahim
Perry is pleased to have two new physicians - Dr. John Ibrahim and Dr. S. Das Pamnani - specializing in Internal Medicine.

Dr. Amanda McGuire, DPM
Amanda McGuire, DPM transitioned to full-time, offering Podiatric Medicine and Surgical Services for the feet, ankles and legs.

The Perry Memorial Hospital Wound Care Clinic was added as a new service line in 2019. Every year, millions of Americans with diabetes or circulatory problems develop non-healing wounds that limit activity or even threaten the loss of legs or feet. Mukund Godbole, MD, CWSP provides patient assessments and oversees specialized treatment plan development by Nina Henkins, RN, BSN, and CWON.

Perry Home Care
In 2019, a natural progression of expanding Perry’s community healthcare included providing Perry Home Care. Home care from our doors to yours now provides skilled nursing, medical rehabilitation, and education for a safe recovery.

Expanded SUPPORT
Support groups bring people together who share a similar life challenge. Participants learn to cope and feel less isolated as they make connections with others who can relate to their situation.

Low Vision Support Group
Quarterly meetings offer visually impaired persons services and resources, the opportunity to connect with others who are having the same experiences, and to learn about adjusting to life with a visual impairment. This meeting is ideal for family and caretakers, too.

Caregiver Support Group
In partnership with Cornerstone Community Wellness, monthly meetings provide support, resources, and education to help family members navigate their role as the primary caregiver for a loved one.
